DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Please provide the serial numbers of the pending applications referenced in page 4.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Siochi P.N. 6,449,335.

Siochi discloses a system for the automated delivery of treatment fields. Applicant's attention is directed to the Summary, Background of the Invention and the description of Fig. 6. The system configures, the sequential operation of radiation shields (see MLC

Art Unit: 2859

Fig.3) for the delivery of radiation fields. The radiation fields may be electron or photon as mentioned on the last line of col. 3. Note that an identification of a sequence group and identification of the type of radiation occurs with the routine use of the optimization engines in consideration of the oncologists prescription as described on the last paragraph of col.1. Siochi meets all the limitations of the claims at issue in their present form.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grosser and Tarr et al. disclose systems for the automated delivery of treatment fields. Note the abstract of each disclosure. Note in particular the use of segments and sequences in these documents.
